

**BRONCHOSCOPY SUB-STUDY MUCIN LABEL ID FORM, BMU
QUESTION BY QUESTION (QxQ), VERSION 1.0**

I. GENERAL INSTRUCTIONS

The Bronchoscopy Sub-study Mucin Label ID Form (BMU) is used to inform which Mucin sample by BRN ID is collected and stored. This information should be entered during the participant’s Bronchoscopy Sub-study clinic visit. This form will populate the Mucin Sample Shipping Manifest Report that is printed prior to shipment once a box is full.

NOTE: Only the designated site level ID should be used to enter information into the site-level forms (DO NOT enter information into these forms under an actual SOURCE participant’s ID). For each site, the site level ID will be structured as the three-letter site code, followed by “000000” (e.g., Columbia’s site level ID will be “COL000000”, University of Iowa’s site level ID will be “IOW000000”, etc.).

The screenshot shows a web interface titled "Data Management". At the top right, there is a search box with a "Search" button. Below this is a table with the following columns: "SubjectID", "First Initial", "Last Name", and "N/A". The table contains four rows of data, all with blue text and light blue backgrounds. The first row, "ALA000000", is circled in red. The other rows are "ALA400006", "ALA400019", and "ALA400027".

SubjectID	First Initial	Last Name	N/A
ALA000000			
ALA400006			
ALA400019			
ALA400027			

This form allows for 24 BRN IDs to be entered, the date that the particular box will be shipped, and the staff code of the person who will be preparing the box(es) for shipment.

II. INSTRUCTIONS FOR INDIVIDUAL ITEMS

NOTE: The following steps assume that a Mucin sample tube has been collected.

- Step 1:** After a Mucin sample tube has been collected and processed for a participant, find the site level ID in the SubjectID list. This should be the first ID that appears on the first page of the SubjectID screen.
- Step 2:** Select the BMU form under the “Bronchoscopy Lab Shipment” form group in the form grid.
- Step 3:** Use the QR scanner/Barcode scanner or manually enter the BRN ID of the participant whose Mucin sample tube was collected in the first slot (i.e., Item 1) or into the next available slot.
- Step 4:** Select **Save and Close** at the bottom of the page/screen after entering the BRN ID.
- Step 5:** Continue entering BRN IDs until all 24 available slots in the form (i.e., Items 1-24) have been filled OR until a scheduled Mucin sample shipment is to be made.
- Step 6:** Once a shipping date of the given Mucin sample box has been decided, record that shipping date in the MM/DD/YYYY format either by selecting the pop-up calendar in CDART or entering the date in the space provided in Item 25 (**The shipping date that is entered in Item 25 will be the shipping date that will be used to create the Shipping Manifest for the Mucin sample box**). Record the SOURCE staff code of the person who will be

preparing the shipment into Item 26. This code is assigned to each person at each site by the GIC. If you do not have a staff code and are collecting SOURCE data, please contact the GIC in order to receive your own individual staff code.

Step 7: Select **Save and Close** at the bottom of the page/screen.

Step 8: After a Mucin sample box has been shipped, create a new occurrence of the BMU form to enter BRN IDs for the next Mucin sample box to be filled and repeat Steps 1-7 (**See Section 3.6 of MOP 6 for instructions on creating a new occurrence of a form**).
